

December 3, 2009

Dear Parents/Guardians,

We have been notified by the Vermont Department of Health of the need to postpone some of our H1N1 Flu clinic dates. The rationale behind this change is the need to get as many first doses as possible given in order to immunize the greatest number of people before starting the second round. The Department of Health also wants to get as many people as possible immunized through the school-based clinics to spread out the immunized population.

The new dates, as of Thursday, December 3 are:

- Rutland Intermediate and Middle Schools December 9 (no change)
- Rutland High School and Stafford Technical Center December 17

The dates for the second vaccination that is required for the children under 9 years of age are:

- Northwest Primary School and Pierpoint January 14, 2010
- Northeast Primary School and SUCCESS January 15, 2010
- Rutland Intermediate School January 7, 2010 (no change)

We will keep you informed of any further changes as/if they develop.

Thank you for your understanding and assistance in this very important matter. Please contact your school nurse or principal if you have any questions.

Sincerely,

Mary E. Moran  
Superintendent of Schools
